SUMMARY

Final-year undergraduate student in Applied Software Engineering at IPB University, specializing in mobile application development using Flutter. Experienced in building complex applications with REST API, Firebase, OpenStreetMap, and TFLite-based machine learning model integration. Proficient in implementing MVVM, Clean Architecture, and BLoC, Riverpod, and GetX state management. Proven ability to complete end-to-end projects in a short timeframe, including ML integration, geolocation features, and satellite service modules. Has won awards in mobile app development competitions and actively works on real-world projects. Committed to delivering scalable, efficient, and production-ready mobile solutions.

EDUCATION

IPB University (2022 - present)

D4 Software Engineering Technology - IPK 3.89/ 4.00

INTERNSHIP EXPERIENCE

PT Telkom Satelit Indonesia

Jul 2025 – Dec 2025

Mobile Developer Internship

- Developing new modules for the Flutter application using Riverpod and Clean Architecture.
- Building satellite internet service activation features with optimal user flow.
- Implementing device monitoring features to display the status and performance of satellite devices.
- Integrating billing features to display user bills and payment history.
- Building satellite internet quota top-up features through REST API integration.

PT Kita Bantu Indonesia

Feb 2025 – Jun 2025

Mobile Developer Internship

- Implementing UI designs into Flutter components based on Figma mockups.
- Converting design assets into modular and reusable widgets for job search portal pages.
- Collaborating with the design and backend teams to ensure user flow suitability and component consistency.
- Debugging and refining the display to ensure responsive UI performance across various devices.

Hugo Studio

Feb 2025 – May 2025

Mobile Developer Internship

- Developed Lumbung Data Mobile application using Flutter to digitalize village letter services.
- Implemented GetX for state management to ensure responsive user flows.
- Integrated REST API to streamline the process of letter submission and tracking.
- Designed a status-tracking feature to enhance service transparency.
- Completed the project from design slicing to final build within 1.5 months and delivered on time.

Elite Home Creations

July 2024 – Sep 2024

Web Developer Internship

- Build a hotel company profile website with Laravel, featuring dynamic room pages, details of each room, and article pages.
- Build an admin dashboard with Laravel Filament for flexible and dynamic content management.
- Create APIs to display room and article data to support effective data integration.
- Implemented Laravel with MVC approach to create a modular and user-friendly system.

PT Moku Ferment House

Mar 2024 – Jun 2024

Web Developer Internship

- Design intuitive UI/UX with a focus on ease of navigation and user experience.
- Developed custom elements in WordPress using Elementor, and added HTML, CSS, and JavaScript code for custom pages.
- Created a kombucha calculator for automatic calculation of ingredients based on milliliter amount input.
- Built a responsive website with call-to-actions designed to drive user conversions.

ORGANIZATIONAL EXPERIENCE

MICRO IT <i>Web Master Division</i> • Participated in regular training on creating native websites and using frameworks. • Learning the initial design in making a website with Figma. • Create responsive website front end.	Aug 2022 – Sept 2024
BEM SV IPB <i>Student Advocacy and Welfare Division</i> • Become a member of the student advocacy and welfare department. • Advocating for students who are economically and financially constrained to attend college. • Recorded all class leaders' data and held an audience forum.	Jan 2023 – Dec 2023

ACHIEVEMENT

1st Web Development IO FEST 2025 Universitas Tarumanagara	July 2025
2st Management Festival Business Plan Competition 2024 Universitas Muhammadiyah Surakarta	Oct 2024
1st UI/ UX Competition Geteksi ITB Stikom Bali	May 2024
Best Initiative Intern Internship PT Moku Ferment House	April 2024
2st UI/UX Competition SI UAJY Ready to Fly Universitas Atma Jaya Yogyakarta	Mar 2024
1st Business Plan Competition Medical Festival Universitas Muhammadiyah Lamongan	Feb 2024
1st Business Model Canvas Agrifest Universitas Muhammadiyah Purwokerto	Feb 2024
1st Winner of Mobile Android Apps Programming INVEST X ISF 8.0 Institut Teknologi Telkom Purwokerto	Dec 2023
1st Winner of Business Plan Competition Management Vaganza Universitas Siliwangi	Nov 2023
1st Winner Debating Competition of Culture and Art Festival Forum OSIS MPK Purwakarta	April 2020

PROJECT

LiteNet Android & iOS App • Developed a cross-platform mobile application for iOS and Android using Flutter. • Applied Clean Architecture principles to ensure maintainable, scalable, and well-structured code. • Implemented Riverpod for efficient and reactive state management. • Integrated REST API communication using Dio for optimized network handling. • Designed and developed responsive and user-friendly mobile interfaces. • Completed the application development within 2 months, from initial development to final deployment.	Mar 2026
DermaScan Android App • Built a mobile application using Flutter with Clean Architecture, MVVM pattern, and BLoC with Freezed. • Integrated a Convolutional Neural Network (CNN) model for skin disease classification using TFLite Flutter.	Apr 2025

- Implemented REST API using Dio to fetch disease details from the backend.
- Secured user scan results using Flutter Secure Storage for local data storage.
- Developed features for image upload via camera/gallery, disease classification, and result prioritization.
- Completed the end-to-end project within 1.5 months, from model development to full application integration.

EmployMe Android App

Feb 2025

- Developed a job portal application using Flutter with MVVM architecture.
- Implemented BLoC for state management to ensure clean and structured data flow.
- Integrated REST API using the http package for authentication and job listings.
- Managed login data securely using Flutter Secure Storage.
- Completed full UI slicing from Figma and core endpoint integration within 6 days.
- Optimized performance and code structure to ensure scalability for future development.

Sunify Android App

Dec 2024

- Integrated the OpenWeather API with the user's GPS location to provide accurate weather predictions.
- Implemented Flutter Map with OpenStreetMap to display the location of solar panel vendors.
- Created a cost estimation calculator to help users calculate solar panel installation costs based on their home energy consumption.
- Used BLoC state management to ensure smooth and responsive interactions.
- Integrated FCM Firebase to send real-time notifications to users.
- Performed unit testing to ensure all features functioned as intended and met design requirements.

One Home Farm Android App

Mei 2024

- Developed an Android application using Java to support farmer productivity.
- Designed features to simulate agricultural needs and check agricultural quality standards.
- Manage farm record keeping and management with an intuitive interface.
- Integrate AI-based consultations to increase efficiency and awareness of sustainable farming practices.

Harvest Android App

April 2024

- Design and develop an Android application using Unity for agricultural education.
- Provide interactive visualization in 3D for various types of fruits and vegetables.
- Implement Augmented Reality technology to create an interesting and interactive learning experience.

SimPet Android App

Dec 2023

- Build a Java-based Android application to help farmers manage livestock needs.
- Develop a simulation feature for livestock needs and resource prediction.
- Building an e-commerce system that facilitates the purchase of tools and livestock needs.
- Provide AI-based consulting services to optimize farm management and increase production yields.
